GOULD INSTRUMENTS

NEXT GENERATION HIGH ACCURACY ELECTRONIC BACKFLOW PREVENTION VALVE TESTING SYSTEM

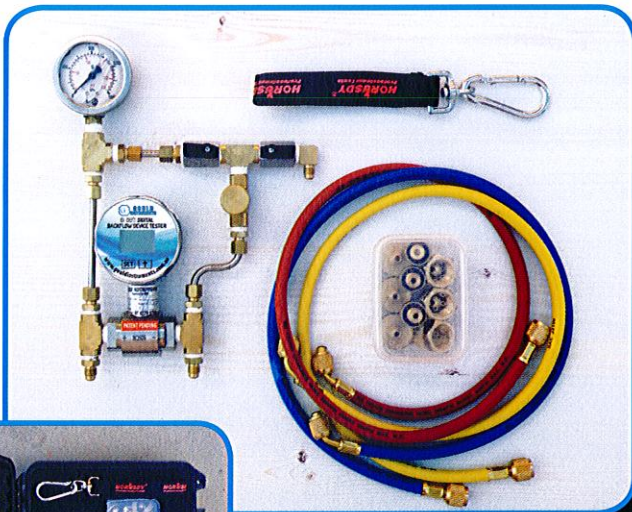

We are proud to introduce our **NEW, next generation high accuracy electronic backflow prevention valve testing system.**

Our model GI-DBT1 incorporates a state-of-the-art digital, full 316 stainless steel D.P. sensor and display, with temperature display and a range of 0/100 kPa, a resolution of 0.1 kPa and accuracy of +/- 1% (or better).

There are no moving parts in the D.P. indicator, therefore eliminating corrosion, hysteresis and poor measurement accuracy.

SPECIFICATIONS	Model	GI-DBT1
	Range (D.P.)	0 / 100 kPa
	Resolution	0.1 kPa
	Accuracy	+/- 1% (or better)
	Temperature Range	-30 / 80°C
	Relative Humidity	0/80% RH
	Acceleration	$\leq 3 \times 9.81 \text{ ms}^{-2}$
	Vibration Frequency Resistance	0 / 300Hz
	Protection Class	IP65
	Power Supply	Long Life Lithium Battery with auto power off feature
Over-Pressure Protection	2000 kPa
